

YOU'RE INVITED TO COMPLETE THE

# Wisconsin Healthy Hearts Survey

**WHY:** Heart disease is the number one leading cause of death throughout Wisconsin and **communities of color are disproportionately impacted.**

**WHO:** In an effort to improve heart health outcomes in Wisconsin, **we're inviting adults across the state with a connection to heart health diagnoses (e.g. high blood pressure, heart attack, high cholesterol, heart disease) either through personal experience or through caregiving for a family member or friend to complete a short survey** about their experience with heart health education and supports. A short video about this project can be viewed [here](#).

**THIS 15-MINUTE SURVEY CAN BE ACCESSED AT  
[HTTPS://BIT.LY/30KQDV7](https://bit.ly/30KQDV7)**

**IMPACT:** Later this year, we will share how your feedback has directly contributed to the development of stronger heart health systems for communities of color across the state.
